EXPERIENCE

AUTOMATION INTERN

Jan 2022 - May 2022

Siemens Centre of Excellence

- Designed and constructed a prototype system for controlling traffic lights and street lights using PLCs.
- Created a working prototype by learning the ladder programming language.
- Responsible for leading a team of four members to develop a successful project.

PROJECTS

PLC BASED TRAFFIC LIGHT CONTROLLING SYSTEM

Automation Engineering

- Explored many electrical components, their real-world applications, and their control through ladder logic.
- Successfully built the logic of a traffic and street light regulating system for efficient energy utilization.
- Simulated the system using SIMATIC HMI by collaborating with a team of four individuals.
